The concept of session

- There is a **session id** (aka token)
  between the browser and the web application

- This session id should be **unique** and **unforgeable**
  (usually a long random number or a hash)

- This session id is bind to **key/value pairs data**

Where sessions values are stored

- **Session ID** is stored in <u>a cookie</u>

- **Session key/value pairs** are stored <u>on the server</u>
