What a web worker can/cannot do **on the frontend**

- ✓ `XMLHttpRequest`
- ✓ `indexedDB`
- ✓ `location` (read only)

- ◉ `window`
- ◉ `document` (not thread safe)

Create a web worker

doSomething.mjs

```
// receive message
self.addEventListener('message', function(e){
  const data = e.data;
  // send the same data back
  self.postMessage(data);
}, false);
```
