OAuth 2

(Standard) RFC 6749

1. The backend **redirects the user to the third-party login-page**
 2. Third-party **asks and verify the login/password** based on the third-party user information
 3. Third party **redirects the user back to the application** with a OAuth token and verifier in the url
 4. Backend **verifies the token** with third party
 5. Backend **starts a session**
- ➡ User's login/password never transit by the application frontend nor backend
